

What is changing?

On February 14th, 2014, BC PSLs is launching a new Landing Page and Specialty Report Forms.

This is what the new Landing Page looks like!

The screenshot shows the BCPSLS Landing Page layout. At the top left is the BCPSLS logo. The main heading is "Report An Event" with a sub-instruction: "Click on the icon that describes the event. Don't see what you need? Click on 'Other Patient Safety Event'". Below this is a grid of 10 icons representing different event types: Fall, Medication, Blood or Blood Product, Pressure Ulcer, Other Patient Safety Event, Safety Hazard, Narcotic Count Discrepancy, Visitor Safety, Security and Property, and Reportable Death (Licensing). To the right of the grid is a "Handler Login" button and a "fraserhealth" logo with the tagline "Returns to HA page". At the bottom right are small icons for "BCPSLS Analytics", "BCPSLS Blog", and "BCPSLS Website".

Callout boxes provide additional information:

- Links to Speciality Report Forms:** Points to the grid of event icons.
- Handler Login:** Points to the "Handler Login" button.
- "Other" Patient Safety Event:** Points to the "Other Patient Safety Event" icon.
- Your Health Authority logo. This example is for Fraser Health.** Points to the "fraserhealth" logo.
- Links to BC PSLs Blog, Website, Analytics and Vimeo.** Points to the bottom right navigation icons.

What do I need to know?

- **Reporters will access** the new Landing Page and Specialty Report Forms **the same way as before**. For example, if you typically go to your Health Authority's PSLs webpage to report an event, that's where you will go after this change.
- **Icons** represent a particular **Specialty Report Form**. To report a safety event involving a patient, client or resident, click on the icon that best represents what happened. For example, to report a "Fall," click on the "Fall" icon. **Tip!** If you don't see what you're looking for, click on "Other Patient Safety Event" to be taken to your Health Authority's general reporting form and complete it as you usually do.
- You can also check out our tools, such as the **BC PSLs blog** and **website**, by clicking on the small icons in the bottom right corner.

Why is this change happening?

The new Landing Page and icons will help Reporters to more easily identify the type of problem they want to report. Each of the Specialty Report Forms uses questions designed with input from experts to capture just the right information we need to help us learn more about the event. And, wherever possible, the forms have been made shorter and more efficient. We hope it will take you less time to fill them out!

Where can I find more information?

Visit our website www.bcpsls.ca or contact the BC PSLs Coordinator at your Health Authority.
